we our sponsors!

Goldman Sachs

Goldman Sachs deals with real-world technology challenges of a size, scale and complexity that very few companies face. Success in their industry hinges on constant innovation and on the technology that backs it up. It's the ability to create and utilize something that wasn't there before, and to do it first. Their technology is their competitive edge. That is why they build it ourselves and why more than ever, they're investing in people who can make innovation happen.

Intel is an American multinational technology company headquartered in Santa Clara, California. One of the world's largest, Intel is one of the highest valued semiconductor chip makers. It is the inventor of the x86 series of microprocessors, the processors found in most personal computers and supplies processors for computer system manufacturers such as Apple, Samsuna, HP and Dell.

Lyft facilitates peer-to-peer ridesharing by connecting passengers who need a ride with drivers who have a car. Download our app for iPhone or Android, and get a friendly, affordable ride within minutes. Just tap a button, and you'll get picked up by a Lyft driver. When the ride ends, the app automatically charges your saved credit card. No need to carry cash!

Our Mission impower every person and every organization on the planet to achieve more

Our Strategy

Wifi Access Link

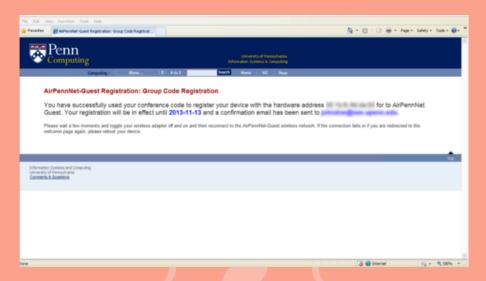

- 1. On your computer or device, view the list of available wireless networks and select AirPennNet-Guest.
- 2. Open an Internet browser (e.g., Internet Explorer, Firefox, Safari, Chrome) and attempt to visit a webpage such as www.upenn.edu. Your browser will be automatically redirected to the AirPennNet-Guest Wireless Service page.

- 3. Under the "I have a..." header, click Group Code.
- 4. On the AirPennNet-Guest Group Code Registration page, enter your name, a valid email address, telephone number, and the Group Code (Group Code: C-FSKCBSPZ) for your event.

5. Click Continue. A page informing you that you have successfully registered your device should be displayed similar to the image below.

- 6. Wait a few moments and then toggle your wireless adapter off and on.
- 7. Re-connect to the AirPennNet-Guest wireless network. You should now be connected to the Internet.

NOTE: If the connection fails or if you are redirected to the AirPennNet-Guest Wireless Service page again, restart your device and repeat this step.

Group Code: C-FSKCBSPZ

Please <u>ONLY</u> use the Group Code specified on your own info pack as we have multiple group codes for the event designated to different participants.

Hack Harassment Track by Intel

We are introducing a track for the event called "Hack for Harassment", partnering with Intel to help find solutions surrounding both online in person harassment amongst women and any other applicable groups. Your hack will address the issue of harassment in some type of way, ranging from a preventative measure to "on-call" response service to post-incident reporting. Please feel free to chat with Alison at Intel's table to talk about different ideas for this. Winners will receive 4 tablets as a prize!

FemmeHacks

Project Submission Reminders

- Project submissions are due on Devpost at 9:30PM on Saturday, February 20, 2016
- If your team would like to be eligible for prizes, your team must submit a demo to Devpost
- Femmehacks 2016 Devpost link: femmehacks2016.devpost.com
